

## Multi-Outlet Drip kit for Window Pots

- Kits are available either for direct connection to a water tap (picture above), or for plunging into a PE tube (illustration below).
- **Water Saving:** The water flow from a regulated mother dripper split equally among few edge drippers. Kits available with 2L/h or 4L/h mother drippers.
- Kits are available for different lengths of window pots: 60cm (3 edge drippers), 80cm (4 edge drippers) and 100cm (5 edge drippers).
- The edge drippers are Self-Forming drippers which allow easy pull out of the inner labyrinth for cleaning.
