

VIBRO-SPREADERS

Standard
Vibro-Spreader

LP
Vibro-Spreader

- Very Accurate and Uniform Distribution of Droplets.
- Self Vibro- Cleaning of the Orifice During Watering Operation.
- Self Locking at the end of irrigation prevents insects entry.
- The LP provides Full Effective Distribution from 1.1 bar.

Discharge and Watering Area Data for Rain-Tal L.P. Vibro-Spreaders

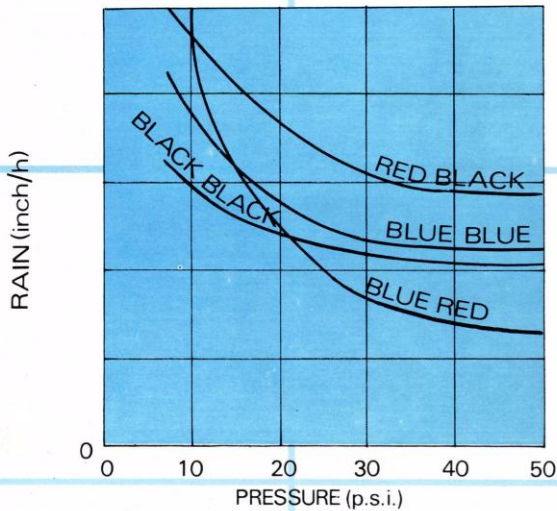

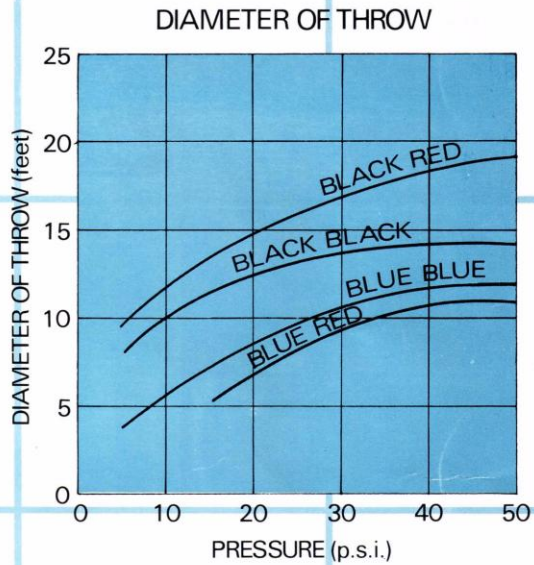

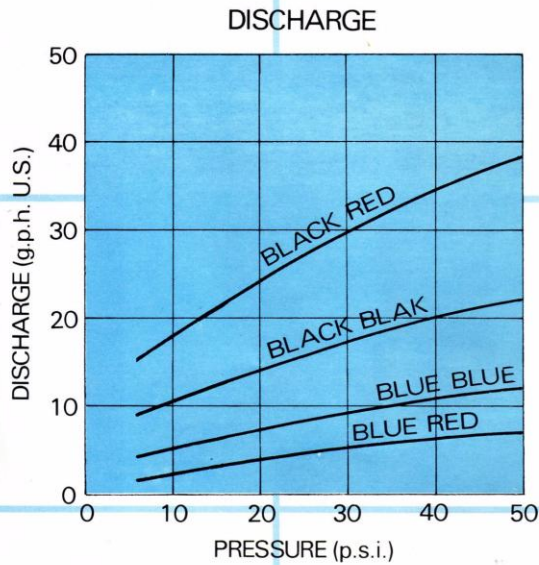

FOR EFFICIENT INDIVIDUAL IRRIGATION OF YOUNG AND MATURE TREES

The EIN-TAL Low Pressure Minisprinkler features an ingenious new design concept that ensures:

- UNIFORM DROPLET DISTRIBUTION even at low pressure irrigation.
- CONSISTENT OPTIMAL DROPLET SIZE, eliminating the variable formation of enlarged droplets or wind born mist encountered in using most conventional sprinklers.
- NO ACCUMULATION OF DIRT OR SALT DEPOSITS between the bow and spindle, through constant vibration of the sprinkler head.
- THE L.P. MINISPRINKLER is automatically sealed against insects after irrigation. Any blockage is instantly cleared by simply opening and flushing the head.

Recommended operating pressure: 15-30 P.S.I.

Available with a range of color coded nozzles providing flow rates of 5, 9, 18, and 30 G.P.H.

MINISPRINKLER COLOR CODE	EFFECTIVE ORIFICE (INCH)	DISCHARGE at 15 p.s.i. (g.p.h. U.S)	DIAMETER OF THROW* at 15 p.s.i. (feet)
BLUE RED	0.027	3.5	5.3
BLUE BLUE	0.035	6.2	6.9
BLACK BLACK	0.050	13.2	12.2
BLACK RED	0.068	22.6	13.2

*Mounted on 10" stake.
